The environment means different things to different people. The environment can be water, air, animals, waste, plants, and other things that are **around** us. Also the environment can be the **social**, physical, cultural and chemical factors that surround man.

There are two types of environment like the natural environment that nature provides, for example the oceans, **land**, seas etc, and the environment that man creates for himself such as houses, technologies and businesses.

The environment is important and we should all **protect** it. We must avoid bad practices such as polluting air and water, and also doing any other harmful activities that destroy the environment.
