<p>متن زیر را بخوانید و به ۵ سؤال بعدی پاسخ دهید.</p> <p>Although you might not like ants when they get in your food or get into your home, ants are interesting tiny insects and do help the environment. They are advanced social insects, because they live in highly organized large colonies where each group has complicated important relationships with many others. The queen ant has wings and its primary function is to lay eggs. The other female ants are called workers. They build the anthill, find food and even act as soldiers. The soldier ants protect the queen, defend the colony and attack enemy colonies in search of food.</p> <p>Ants don't have ears. Ants hear by feeling vibrations in the ground through their feet. They can carry things 20 times heavier than their own body weight. The muscle arrangement in an ant gives it great strength allowing it to carry heavy things toward the entry point of the anthill. Their colonies can contain millions of ants. When a queen ant dies, the entire colony usually dies within a few months. Although many people may suppose that ants aren't dangerous, scientists have compiled a list of them which can hurt. For instance, there is a kind of ant in Australia that has a bite and can kill a person.</p>

<p>متن زیر را بخوانید و به ۵ سؤال بعدی پاسخ دهید.</p> <p>Energy is the ability to do work. It can take a variety of forms: mechanical, chemical, and nuclear. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil, and coal.</p> <p>We get most of our energy from these fossil fuels, but this is harmful to the environment. Fossil fuels are nonrenewable and cannot be replaced easily. Once we use them up, they're gone forever. They are not clean as they pollute water or air.</p> <p>In recent years, scientists try to use other types of energy resources. They call them clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine, tides, and plants.</p> <p>The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year.</p>

Respect is not only for people, you also need to respect nature. You should learn to respect nature and also teach it to your generation. There are some good ways to improve the sense of respect for nature among society.

When you are outside with your children, take the time to show them the beauty of nature. Show them the blueness of the sky on a clear, bright day, or grey sky on a cloudy day. Ask your child to touch trees, rocks and leaves to feel the tempratures. You can also teach your child the names of different plants, trees, and animals and practice identifying them. You can do these and show the beauty of nature in your yard or in your favorite park. You may buy a plant for each child that they can take care of inside or outside of the house. You should remind your children that all living creature are parts of our world and are valuable in the natural environment.

<p>متن زیر را بخوانید و به ۵ سؤال بعدی پاسخ دهید.</p> <p>Many countries now think that cars that burn fossil fuels should be replaced by electric cars. Electric cars don't burn gasoline in the engine, so they don't pollute the air. They use electricity stored on the car in batteries. Sometimes, 12 or 24 batteries, or more, are needed to power the car. Just like a remote-controlled car, an electric car has an electric motor that turns the wheels and a battery to run the motor. Electricity, the same energy that lights your lamps and runs yours TV, is stored in batteries on an electric car. The batteries can be like the batteries you find in flashlight or in regular gasoline cars. To get the battery ready to roll, you have to charge it. This process isn't much different from the way you charge the portable devices you carry around every day: your cellphone, MP3 player, or digital camera. The difference is that you deal with a much bigger gadget that carries you around instead.</p>

<p>متن زیر را بخوانید و به ۵ سؤال بعدی پاسخ دهید.</p> <p>Most of our enegy comes from fossil fuels: oil, coal, and natural gas. Fossil fuels are from plants and animals that lived millions of years ago. They are nonrenewable energy resources since they take millions of years to form, and we cannot replace them easily. By burning oil and coal, we get energy. It may be impossible to find them someday to create this energy. We need to use less energy to save these natural resources for the future.</p> <p>There are many options to lower home energy use with simple changes and good energy habits. It is about being aware of our energy uses. Simple actions can reduce energy <u>consumption</u>. Many people are using more and more energy. It causes our weather conditions to change and may result in higher energy bills. We all need to be more energy efficient and use less, reuse, and recycle it in our homes. Working together to save energy will help us have a healthier planet for future generations.</p>

<p>متن زیر را بخوانید و به ۶ سؤال بعدی پاسخ دهید.</p> <p>Trees are important plants that are everywhere. They are in different shapes and sizes, but they all are valuable and beautiful. Trees give us clean and fresh air. They <u>take in</u> a dangerous gas called carbon dioxide produced by burning fossil fuels, and they give out oxygen, which is necessary for life. Without trees, the air would not be healthy.</p> <p>Trees provide a safe place for animals. They are homes for many of them and also give food to those animals. Trees make us cool on hot and sunny days. Their leaves provide a place to relax and have picnics. They also help stop the land from washing away with their strong roots. People can also use the wood from trees to make houses, tables and paper. In conclusion, humans should consider the importance of trees for the earth. They should take care of the trees and protect them.</p>
