	<p>متن زیر را بخوانید و به ۵ سؤال بعدی پاسخ دهید.</p> <p>Although you might not like ants when they get in your food or get into your home, ants are interesting tiny insects and do help the environment. They are advanced social insects, because they live in highly organized large colonies where each group has complicated important relationships with many others. The queen ant has wings and its primary function is to lay eggs. The other female ants are called workers. They build the anthill, find food and even act as soldiers. The soldier ants protect the queen, defend the colony and attack enemy colonies in search of food.</p> <p>Ants don't have ears. Ants hear by feeling vibrations in the ground through their feet. They can carry things 20 times heavier than their own body weight. The muscle arrangement in an ant gives it great strength allowing it to carry heavy things toward the entry point of the anthill. Their colonies can contain millions of ants. When a queen ant dies, the entire colony usually dies within a few months. Although many people may suppose that ants aren't dangerous, scientists have compiled a list of them which can hurt. For instance, there is a kind of ant in Australia that has a bite and can kill a person.</p>

<p>متن زیر را بخوانید و به ۵ سؤال بعدی پاسخ دهید.</p> <p>Children are taught to respect elders by their parents at very young ages. Throughout school and university, they are reminded of them while their personalities develop. But still, we often forget to respect our elders. Respecting elders should come from within. Respecting elders come under good habits manners. Everyone welcomes a well-behaved person. As we all know, history repeats itself. If we will respect our elders today, we will get respect when we grow old.</p> <p>There are many ways to show respect to elders. For example, they feel happy and honored when we include them in the decision making of the family. They are more experienced than us and they also have walked the same path before us. So , we should always ask for their advice.</p> <p>Another way is listening to <u>them</u> and following their customs, which they have lived up to. We should also <u>repeatedly</u> visit them and invite them to our house, too. We should often sit and eat with them. All this will help us to recognize and appreciate our elders. Always remember that people are always judged by their actions and each word or action has a reaction. So, if you want to succeed and be happy in life, start respecting elders by being polite. Finally, I would like to say, our elders are really worthy and we should respect them.</p>

Energy is the ability to do work. It can take a variety of forms: mechanical, chemical, and nuclear. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil, and coal.

We get most of our energy from these fossil fuels, but this is harmful to the environment. Fossil fuels are nonrenewable and cannot be replaced easily. Once we use them up, they're gone forever. They are not clean as they pollute water or air.

In recent years, scientists try to use other types of energy resources. They call them clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine, tides, and plants.

The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year.

Trees are important plants that are everywhere. They are in different shapes and sizes, but they all are valuable and beautiful. Trees give us clean and fresh air. They take in a dangerous gas called carbon dioxide produced by burning fossil fuels, and they give out oxygen, which is necessary for life. Without trees, the air would not be healthy.

Trees provide a safe place for animals. They are homes for many of them and also give food to those animals. Trees make us cool on hot and sunny days. Their leaves provide a place to relax and have picnics. They also help stop the land from washing away with their strong roots. People can also use the wood from trees to make houses, tables and paper. In conclusion, humans should consider the importance of trees for the earth. They should take care of the trees and protect them.
