For English teachers, a dictionary is essential for any teaching program and needs to be used carefully. A dictionary is the basic thing for any language class. The most important thing that a student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly. The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary.

When teaching begins, learners will use a bilingual dictionary for simple translations. Monolingual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc. The problem becomes hard with studies when the students do not fully understand the words **they** are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jump into to the next lesson. When the students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out.

True / False

29. A dictionary is the basic thing for any language class. a) True b) False
30. Students must have more than four dictionaries to learn English a) True b) False

Choose the best answer.

31. What is the main idea of the text?
- a) Dictionaries are essential for language learning.
b) Bilingual dictionaries are the most important types of dictionaries.
c) All of the students cannot figure out what they read.
d) Monolingual dictionaries are the most expensive dictionaries.
32. What does the underlined "they" in paragraph 2 refer to?
- a) problems b) teachers c) dictionaries d) students

Answer the questions.

33. When should teachers clear up students' confusion?
34. What must the students have when they enter a more advanced level?

۴ Recently people are becoming more interested in new types of cars because of some good reasons. For example, electric cars do not burn gasoline in the engine, so they do not pollute the air. They use electricity stored on the car in batteries. An electric car is usually plugged in at night. It can be plugged into a special charging unit even at houses. Some electric cars can be plugged right into a **regular** electrical wall outlet. Others need a larger outlet, like the kind that a stove or a vacuum cleaner plugs into. The engineers are trying to make better batteries that hold more energy and last longer. To overcome the problem of charging electric cars, hybrid cars are also available. **They** combine the benefits of gasoline engines and electric motors. They can be designed to meet different goals, such as better fuel economy or more power.
