The United Arab Emirates (UAE) is a country with a lot of oil. Oil brings the country billions of dollars each year. So, why is the UAE building a city that uses very little or no oil? The answer is simple: oil will not last forever. Engineers are now building a new city that uses mostly solar energy for its power. The city is called Masdar. Masdar will reuse as many resources as possible. It will reuse about 80 percent of its water and change most of its waste into more energy. People in Masdar are even using building materials that they can reuse in the future.
